Twin Media specializes in providing clients with personalized and professional services for setting up and maintaining their internet presence and e-Communications needs.

We've been in business in the Greater Danbury area for over 20 years, providing companies and corporations with a full range of New Media including website design, Biz-Card CD presentations and e-incentive marketing.

Our creative use of graphics, programming and web interactivity will set you apart from the competition. To do this, we offer a wide variety of high level services custom tailored to your particular business needs.

Clients use our web services to update existing websites in addition to developing new sites. We've created a number of internal sites for GE Capital, GE Capital Real Estate, Scholastic/Grolier and Duracell, as well as The Stanley Works. These sites have included bi-lingual development, database access, training - tutorial sessions and development of interactive Flash web applications.
